[Natural Alexandrite Ring on Sep 16 2009, at 06:59](#)

Look at this very fine [natural alexandrite ring](#) with a fantastic blue green daylight color.

This [alexandrite deposit](#) in India is known for the beautiful daylight colors of its gemstones but the color of this stone is exceptional and in a class of its own. A really stunning and one-of-a-kind alexandrite gem in a beautiful setting.
