

Strong Color Change Alex. Oval 2.10cts.

An unusual combination of a strong color change, good cutting, and superior clarity. Alexandrite is rarely this nice and both the daylight blue-green and the incandescent red purple colors are very attractive. The saturation of the daylight blue-green exceeds the top GIA color grade for alexandrite and the stones from this deposit may very well end up resetting GIA's color standard for alexandrite.

Grade Score 8 / 10

Color Good (3/5) Cut Exceptional (5/5) Carat Large (4/5) Clarity Exceptional (5/5) Rarity Extremely rare (5/5)
